copper & alloys

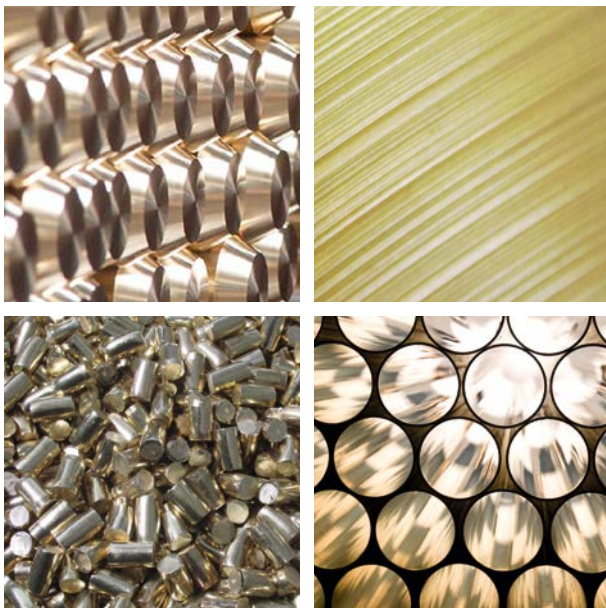

Your innovative partner for copper & copper alloys

As an independent representative, DEUPOL has established itself since decades on the market for non-ferrous heavy metals, with its high-quality, custom-made, newly manufactured semi-finished products. Our clients from trade and industry in Germany and abroad value our personal, professional and reliable handling and products which meet the highest quality demands.

Our comprehensive product range, quality, flexibility and fairness will also contribute to making us a very interesting potential and service-oriented partner for you. Thanks to made-to-order new production, we can meet your specific requirements down to the last detail. This presupposes, however, a viable overall quantity. Our expertise assembled from the most varied branches of industry and our profound specialisation in heavy metals will guarantee your success.

What makes us stand out?

- A comprehensive range of non-ferrous metals
- Specific know-how on “copper & alloys” commodity market
- Made-to-order production to international standards or individual customer specifications
- Special qualities and tolerances, high-performance alloys, intermediate sizes
- Surface treated rolled products (HDT / galvanized)
- Technically skilled personnel, expertise and decades of experience
- Quality and reliability
- Financing, hedging, price security
- Chips and stamping scrap redemption / conversion (tolling)
- Prompt decisions and specialist consultation
- Flexibility and competitiveness
- Optimised disposition planning and route monitoring
- Works stock and supply against call-off with made-to-measure logistics solutions
- Small quantities in combination
- Tailor-made sizes and pre-processing of semi-finished goods
- Customer-specific complete solutions
- Risk validation, long-term contract agreements
- German / European law and warranty

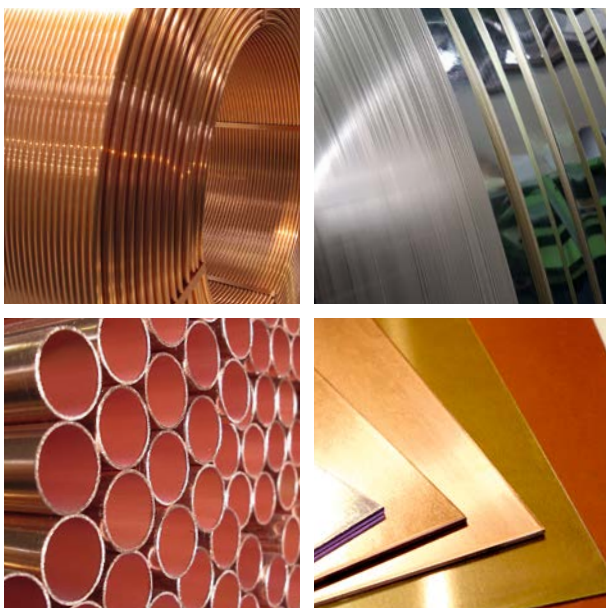

Service

As a customer, you have your own personal contact partner, who will provide you with expert advice and assistance, and who is also responsible for successful delivery. This allows short decision-making times and prompt reaction – all for your benefit.

Our staff is working flexible, reliable and quick. Years of experience and detailed technical know-how is the assumption for highest customer advisory service.

Our internal goods disposition enables individual planning, production and monitoring of shipments. Fixed transport agreements and capacity reservations enable us to notify customers of exact delivery times even after the goods leave the works.

The unloading of complete truck-loads and utilisation of residual capacities allows us to make the best possible cost-benefit calculation, which we pass on to you, the customer, in the form of economic prices.

Purchasers

In addition to specialist stockists, our satisfied customers also include well-known industrial companies from many industry sectors from all over Germany and its neighbouring countries, such as the:

- Electronics and electronic technology
- Stamping and contact industry
- Deformation technology
- Turning and forging technology
- Automotive supply industry
- Energy production and technology / solar power industry
- Equipment and engineering
- Cooling and air-conditioning technology
- Fitting and sanitation industry
- Welding technology
- Fastening technology
- Cable industry / cable-shielding
- Lamination technology
- Ship-building / off-shore / marine
- Drive technology / sliding bearings
- Printed Circuit Board (PCB) production
- Extraction and mining industry
- Railway industry
- Defence technology
- Furniture industry
- Construction
- Battery production
- Coinage
- Paper and printing industry
- Medical technology
- Instrument manufacturers
- Arts and crafts

We will be happy to discuss further details with you in person.

Quality, environment & energy

For DEUPOL, quality means much more than that our clients will gladly return to us again, but also that we meet the required standards and have all the required certifications. "Quality is when everything is in order" – meaning that our quality requirement is for everyone who works with us to feel at ease at all times and with certainty. Clear principles have been defined for our corporate activities relating to services and products, as well as our business processes.

Naturally, we and all of our partners are certified in accordance with ISO 9001 and observing IATF 16949. This guarantees optimised techniques, processes and procedures in all areas. The production facilities hold, if agreed, all system and production applicable approvals and the necessary testing equipment.

DEUPOL is also individually technically approved and audited as a supplier for several renowned conglomerates. We even work out customer-specific delivery requirements with you, which can then be specified in future production to meet your specific requirements.

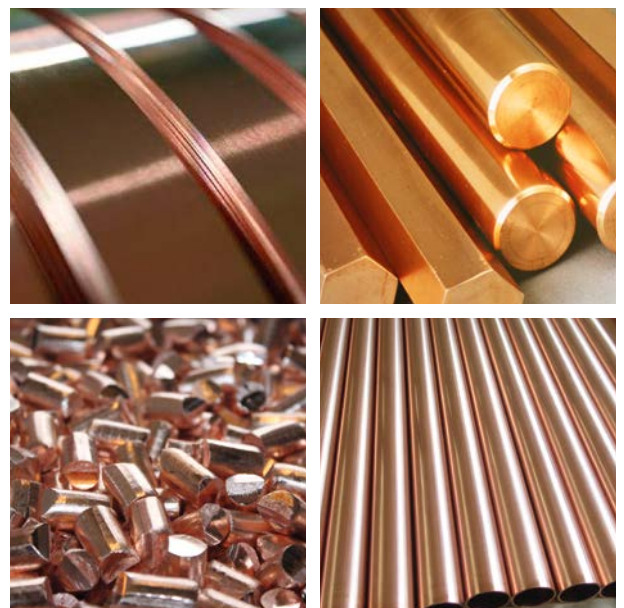

Environmental protection and energy efficiency is a significant topic and we are aware of our responsibility for nature and humanity. Economic action based on ecological principles is the set aim of our environmental policy. Emission must be constantly minimized. The productions are constantly working on optimized process conditions. In logistics, efficient capacity utilization, optimized routes and the latest vehicle technology are used. Not only are our supplied raw materials almost 100% recyclable - packaging is also made from recyclable and environmentally friendly materials to prevent waste.

Procurement management

We aim for a reorientation in the procurement management that is innovative for you, at competitive conditions, based on a reliable and constant delivery performance. We principally appreciate a long-term orientation when it comes to our cooperation with clients and business partners. The focus in this is always on an optimization of processes, advantage of synergy effects and improvement of the efficiency.

In the process, we not only rely on empirical values, but also make use of highly professional, future-oriented and investment-confident manufactures and suppliers to really cater to every need. You always benefit from the latest technologies and developments, as well as comprehensive know-how, because we place our production orders where the respective specialists are. We focus on the essentials: your requirements! And that far beyond the borders.
