Our energy policy

DEUPOL GmbH Buntmetalle is committed to a long-term reduction of its energy consumption and improvement of its energy efficiency in a continuous optimization process. Our implementation of these aims is based on the energy management system of the EN ISO 50001:2011 standard. We ensure in the process that the requirements of this standard are realized as well and processes within this energy management system are continuously improved.

We ensure that

- all currently applicable and relevant laws, rules and regulations are complied with
- the required financial and structural requirements are met
- all the staff are integrated in the implementation and execution of the energy management system
- relevant legal obligations and other requirements are observed
- evaluations are performed with respect to the energy efficiency and energy consumption
- programmes promoting energy efficiency are introduced and executed as required
- energy-efficient products and services are acquired that contribute to an improvement of the energy-related performance

the results are measured and monitored.
