Our environmental policy

DEUPOL GmbH Buntmetalle is aware of its responsibility for nature and humanity. Economic action based on ecological principles is the set aim of our environmental policy. Our implementation of this is oriented towards the EN ISO 14001 standard and the European Union's "Eco-Management and Audit Scheme" (EMAS) environment management system. We ensure in the process that the requirements of these standards are implemented and the processes within this energy management system continuously optimized.

This means in detail:

- We undertake to continuously improve the environment protection measures. These include the avoidance of environmental pollution such as waste and emissions as well as an improvement of our energy-related performance.
- We ensure the environment-friendly production and marketing of our products. Thanks to their characteristics, the use of these products will often lead to an improvement in the energy efficiency of processes. The 100 % reusability of copper and its alloys makes the products infinitely recyclable.
- We observe all statutory obligations and other environmental protection requirements we have committed ourselves to. We additionally undertake to not only meet the legal requirements, but also ensure a continuous improvement of the company's environmental protection.
- In the disposal and recycling of raw materials, we only work with partners that are recognized in keeping with the German Waste Management Facility Ordinance (EfbV) and certified as per section 56.2 of the German Lifecycle Management Act (KrWG).
- We are engaged in a continuous dialogue with our customers, suppliers, employees and the authorities, and cooperate with them constructively. This includes the development of shared environmental policy objectives.
- We require our service providers and suppliers to act in keeping with the principles formulated in this policy. This applies to the provision of products and services in equal measure.

We regularly monitor our departments and processes and continuously develop our environment management further.
